Guilherme Oliveira

Orlando, FL | (407) 860-5602 | olivxzs@gmail.com | linkedin.com/in/notgui | github.com/oliveirag

EDUCATION

University of Central Florida **Aug 2024 - Dec 2027**

Bachelor of Science, Computer Science (GPA: 3.7/4.0)

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Organization, Systems Software, Discrete Structures

PROJECTS

Zaklang – Token-Efficient Language for LLMs *Python, FastAPI, PostgreSQL, React*

- Building Zak, a strictly typed language that compiles to Python, with a 7-person senior design team, plus ZakBench, which scores LLM-written Zak against Python on hidden-test correctness and token usage.
- Built the React 19 and TypeScript web playground with Vite and TanStack Query, featuring task selection, editable Zak and Python code, and a staged view of the compile, run and scoring pipeline.
- Built JWT login and registration with token refresh, and deployed the frontend on Railway.

Ollie – AI Trading iOS App *Swift, SwiftUI, TypeScript, Node.js, PostgreSQL, Docker*

- Architected a multi-user trading signal platform on Robinhood's Agentic Trading MCP, isolating a private orchestrator from a read-only subscriber server so each subscriber executes independently through their own brokerage account.
- Built a native iOS client in Swift/SwiftUI enforcing human-in-the-loop approval before any order reaches the broker.
- Designed a Node.js/TypeScript backend with PostgreSQL, exposing OpenAPI-documented endpoints and append-only logging for an immutable, auditable track record.
- Implemented risk controls including per-account position caps and a global kill switch, containerized with Docker and deployed on Railway.

OneTap – Credit Card Rewards App *React Native, Expo, TypeScript, Node.js, Plaid, Stripe*

- Built an iOS app with a 4-person team that charges each NFC card tap to the user's highest-rewards credit card.
- Led the Expo and React Native frontend, building questionnaire onboarding with email sign-up, a card carousel and a dashboard showing the routed card and rewards earned within about 2 seconds of a tap.
- Wrote the Supabase payment-routing migration and shared TypeScript contracts for a Node.js/Express backend that links banks via Plaid, charges cards through Stripe and reads taps from a USB NFC reader.

Aperture – AI Investment Research Platform *Next.js, React, TypeScript, Supabase, Gemini API*

- Led frontend for a 4-person ShellHacks 2026 team (Blackstone challenge), shipping a full-stack investing web app with Next.js, React 19, TypeScript and Tailwind CSS on Vercel.
- Integrated the Gemini API for screenshot portfolio import, cited research and a multi-agent bull/bear investment committee, with non-AI fallbacks when API quota runs out.
- Built deterministic ETF look-through, fund overlap and stress-test analytics on Finnhub and SEC EDGAR REST APIs, plus beginner-to-advanced adaptive views with Supabase auth.

EXPERIENCE

ServiceNow University | *Academic Extern (Remote)* **Jun 2026 - Jul 2026**

- Completed a 6-week externship in ServiceNow administration, ITSM, Flow Designer and Now Assist.
- Configured Flow Designer workflows and AI Agent automations in hands-on platform labs.
- Attended instructor-led workshops and networked with ServiceNow engineers and hiring partners.

The Walt Disney Company | *Lifeguard* **Mar 2024 - Present**

- Maintained vigilance over swimming areas, preventing incidents and performing 5+ emergency rescues.
- Enforced safety rules and communicated with 100+ patrons daily to ensure a safe environment.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, TypeScript, JavaScript, Swift, SQL, HTML/CSS

Frameworks & Libraries: React, React Native, Expo, Next.js, Node.js, Express, FastAPI, SwiftUI, Tailwind CSS

Tools & Platforms: Git/GitHub, Docker, VS Code, Xcode, PostgreSQL, Supabase, MongoDB, REST APIs, Gemini API, OpenAI API, MCP, OpenAPI, Plaid, Stripe, ServiceNow, Figma, CI/CD

Cloud & Infrastructure: AWS, Vercel, Railway, DigitalOcean
